Now available in EMEA, VicFlex™ Series AH2-CC

EASTON, Pa. – February 26, 2018 – Victaulic's VicFlex™ [Series AH2-CC Braided Hose](#) is now available in the EMEA region. The new hose retains key qualities of the Series AH2, including its 100 percent kink resistance and industry-leading bend radius (2" cULus listing).

The Series AH2-CC utilizes patented captured coupling technology, and provides a flexible connection from the branch line to the sprinkler head with a mechanical joint instead of a threaded union. In previous models, pipefitters had to tape or dope the threads of the branch line nipple and thread it into the branch line outlet, using a pipe wrench to tighten the connection. The AH2-CC provides a pipefitter-friendly option by eliminating the need to use a pipe wrench on the branch line side, reducing installation time and enhancing jobsite safety.

About Victaulic

Since 1919, Victaulic's pipe joining and flow control solutions have optimized construction productivity and reduced risk, ensuring projects are completed safely, on time and within budget. Driven by a spirit of continuous innovation, Victaulic's portfolio of 100,000+ products and patented technologies promote freedom of design, as well as simplified inspection and maintenance for the life of any system.

With more than 3,500 employees and 40 international facilities, Victaulic helps customers in over 120 countries succeed in the global construction industry. From the tallest buildings to the deepest mines, customers trust our products to increase overall system durability in the most demanding construction projects and operating conditions.
